Day 4: Personalized Student Feedback Prompt Guide

AI Prompt: Generate Personalized Student Feedback

After pasting in a student response or your teacher notes, use this prompt:

"Write a kind, specific, and encouraging comment for this student based on the notes above. Focus on their effort and give one actionable suggestion for improvement. Keep it appropriate for a [grade level] tone."

Refinement Tips: Adjust Tone and Voice

If the first version feels too formal or robotic, try follow-ups like:

"Make it sound like a 5th grade teacher."

"Use a positive and upbeat tone."

"Add a sentence that praises their creativity."

"Keep it under 3 sentences."

Small tweaks = better, faster results every time.

Bonus Prompt: Batch Feedback for Multiple Students

You can generate comments for multiple students at once. Start with a list like:

Student A: Strong effort, needs work on punctuation

Student B: Struggled with the concept but great participation

Student C: Creative ideas but missed structure

Then use this prompt:

"Write personalized teacher-style feedback for each student on this list. Be warm, encouraging, and include one area to improve."
